HOLLAND BULBS.

WE GROW OUR OWN.

When patronising our firm, you are assured of a highly specialised service, rendered by experts, giving you advice in regards to the growing of Bulbs and also supply you with a proper planting plan, so that, regardless of location or soil conditions, maximum results may be attained.

Above all, however, you are assured of excellent quality, grown on our own nursery at Noordwijk, Holland, harvested, graded and packed by our own men, under our personal supervision. In other words, at no time do we depend upon some one else to look after the interests of our clients and the work is done at all times by men, whose families have been in this business for generations.

Under those circumstances we take little risk in guaranteeing our bulbs to be **true to name**, the best nature produces and we offer to **replace gratis any bulb** purchased from us, which does not produce a good bloom under ordinary care.

The prices of all bulbs in this catalog are for finest selected stock and include all charges, except those for packing and delivery by express or parcel post from Stamford, Conn. or New York and for our Pacific Coast clientele from San Francisco, California.

Inquiries for catalogs, etc., orders and payments to be addressed to us in Stamford, Conn. Personal checks are always acceptable. Orders for less than \$ 10.00 should be accompanied by cash.

Collective orders for Garden Clubs are invited and lectures on any type of bulbs are given free of charge.

We do not carry stocks in America and therefor recommend early ordering, before September first, to avoid disappointment.

All names of tulip varieties listed in this catalog, are in accordance with the list of tulip names, compiled by the Royal Horticultural Society in conjunction with the Holland Bulbgrowers Association.

The names printed in heavy types are those of outstanding varieties or novelties.

Triumph Tulips.

With all due respect to the old Single and Double Early Tulips, it is now generally accepted, that the Triumph Tulips, with their much longer stems, very much sturdier growth and substance, are far better adapted to the American climate, therefor will last longer outside and also for early forcing give more satisfactory results.

The Triumph Tulips originate from crossing Single and Double Early Tulips with Darwin Tulips, which gave them the form and habits of the Darwin Tulips and they flower at the same time as the Early Tulips.

These consist of the largest and finest selected bulbs of the Dutch Hyacinths and are best used for potwork. After they have been dried and stored in a cool place, they should be potted up in a light sandy soil; do not use new pots, unless they have been soaked for some time. Before plunging them in a cool spot, the ground should be soaked; a layer of sand on top of the pots, to prevent damaging the crowns, when removing the pots during frost, is advisable. When bringing them in the greenhouse, keep the bulbs in subdued light, until the bud is sufficiently grown out of the bulb; temperature about 70 F., a little lower when the flower is visible.

Considered by many experts as the very best of the new super-giant yellow trumpets; despite its huge size (perianth-being five to six inches across) the whole flower is beautifully proportioned and is carried graceful on flattened tapering stems, two feet tall, entirely free from the amaryllis-like stiffness of many of the giant trumpets; the broad overlapping petals forms a star-shaped perianth of medium deep primrose, trumpet somewhat more deeply colored, undoubtedly one of the top-notchers for many years to come.

\$ 4.50 for 10, \$ 40.00 per 100.

OLYMPIA. A much improved and enlarged Emperor, free-flowering and hardy. \$ 1.60 for 10, \$ 14.00 per 100.

DICK WELLBAND. One of our finest introductions, very strong grower and exceptionally free-flowering. The perianth is pure white and the cup flame orange. One of its most remarkable qualities is that the color does not fade, but rather intensifies with age. The flower lasts unusually long and we believe that this variety will be of the greatest value both for greenhouse work or for outside. Its great beauty lies in the startling contrast between petals and cup which makes it stand out in the largest collections of daffodils. A worthy companion to Francisca Drake. \$ 2.50 each.

Among all the fine daffodils of recent introduction, no other has more quickly made a name for itself; a flower of great size, 4½ inches across, with wide flaring trumpet 2 inches across, the whole flower being finely proportioned, and borne on a tall stem with a good neck, in color the perianth is pure citron yellow, and the cup chrome yellow, deepening slightly at the frilled edge, conspicuous styles of the same shade as the perianth add to its beauty, outstanding and in every way a satisfactory, as well as a sensational flower, both in the garden and on the show table. \$ 10.00 each.

Water soil before potting, because Iris never start in dry soil. Plunge pots outside, bringing them in the greenhouse around November 15th., keeping them cool. Iris do not stand a high temperature.
